

FINAL

**PHASE I ENVIRONMENTAL BASELINE SURVEY
FOR LEASING NELLIS AIR FORCE BASE LAND FOR CONSTRUCTION AND
MAINTENANCE OF A STORMWATER DETENTION SYSTEM
AND RELOCATION OF MILITARY FAMILY HOUSING
CLARK COUNTY, NEVADA**

NOVEMBER 2006

Report Documentation Page				Form Approved OMB No. 0704-0188	
Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

EXECUTIVE SUMMARY

This Phase I Environmental Baseline Survey report was prepared to support the proposed lease of 35 acres within an approximately 86-acre tract (hereafter referred to as subject property) owned by Nellis Air Force Base (AFB) to a contractor for the construction and operation of a Stormwater Detention System (SDS) and relocation of Military Family Housing (MFH). Easements for stormwater channels will also be granted. The SDS will be used as a primary flood control detention system for the proposed improvements to the Manch Manor base housing project. The property in consideration is a portion of Area III, and is located near the northwestern boundary of Nellis AFB, Clark County, Nevada (see Figures 1 and 2, Appendix B).

This report was prepared and the site reconnaissance was conducted according to Air Force Instruction 32-7066: Environmental Baseline Surveys in Real Estate Transactions and the American Society for Testing and Materials guidelines ASTM E1527-05 which define good commercial and customary practices in the United States for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation, and Liability Act (42 USC 9601).

According to information gathered from document searches, interviews, and the site reconnaissance, Gulf South Research Corporation (GSRC) found no evidence of contamination in connection with the subject property and found no evidence of contamination on adjacent properties.

GSRC recommends that solid waste scattered throughout the subject property should be disposed of in accordance with local, state, and Federal regulations and the Nellis AFB Solid Waste Management Plan. GSRC recommends that no further environmental studies be conducted for the property.

SECTION 1.0
PURPOSE FOR THE ENVIRONMENTAL BASELINE SURVEY

1.0 PURPOSE FOR THE ENVIRONMENTAL BASELINE SURVEY

The purpose of this Phase I Environmental Baseline Survey (EBS) is to (1) document the nature, magnitude, and extent of any environmental contamination of the subject property considered for the out-grant lease; (2) identify potential environmental contamination liabilities associated with the proposed transaction and establish environmental due diligence; (3) develop information to assess health and safety risks; (4) protect human health and the environment; (5) determine possible effects of contamination on property valuation; (6) provide notice of environmental condition when required under Section 120 [h] [1] of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 as amended (42 USC 9620 [h] [1]) or any applicable state or real property disclosure requirements.

1.1 BOUNDARIES OF THE PROPERTY AND SURVEY AREA

The legal description of the subject property, located in Area III, is S1/2 Section 32 Township 19 South, Range 62 East (see Figure 2, Appendix B):

THIS PAGE LEFT INTENTIONALLY BLANK

SECTION 2.0
SURVEY METHODOLOGY

2.0 SURVEY METHODOLOGY

2.1 APPROACH AND RATIONALE

This report was produced in accordance with the following:

AFI 32-7066

“This instruction implements Air Force Policy Directive (AFPD) 32-70, Environmental Quality, by spelling out responsibilities and procedures for an Environmental Baseline Survey (EBS) in a real property transaction. This instruction also covers additional procedures for transactions involving unremediated real property and for the termination or expiration of temporary interests in real property.”

ASTM E1527-05

“The ASTM guideline defines good commercial and customary practices in the U.S. for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the CERCLA (42 USC 9601). This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability.” Gulf South Research Corporation’s (GSRC) scope of services for this project includes four major components: (1) Federal, state, and local environmental records review, including a review of historical and physical setting records; (2) a site reconnaissance to search for visible indications of contamination or potential contamination to the environmental or human health and safety; (3) interviews with key site personnel and local government officials; and (4) the preparation of this report.

This EBS report categorizes the presence of hazardous substances or petroleum products or their derivatives for the subject property into the following:

Category 1 – No storage, release or disposal has occurred. Property where no hazardous substances or petroleum products or their derivatives were stored, released into the environment or structures, or disposed on the subject property and where no migration from adjacent areas has occurred.

Category 2 – Only storage has occurred. Property where hazardous or petroleum products or their derivatives were stored, but no release, disposal or migration from adjacent areas occurred.

Category 3 – Contamination below a level that requires any action. Property where contamination is present but falls below established action levels characterized pursuant to the Environmental Restoration Program (ERP) that is managed by the Restoration Program Manager (RPM) of the 99 CES/CEVR.

Category 4 – Remedial action required and taken. Property where contamination above action levels existed but all remedial actions necessary to protect human health and the environment have been taken to meet the provisions of CERCLA Section 120 (h) (3).

Category 5 – Remedial or other action underway. Property is undergoing remedial action for known contamination.

Category 6 – Required response action not implemented. Property contains known contamination and required remedial systems or other actions have not been selected or implemented.

Category 7 – Further evaluation required. Property has indications of existing contamination or the potential for a release of hazardous substances into the environment or structures, but not well characterized pursuant to the ERP.

2.1.1 Description of Documents Reviewed

GSRC contracted Environmental Data Resources, Inc. (EDR; see Appendix A) to search Federal and state environmental databases that track activities associated with hazardous waste and incidents that have resulted in major environmental impairment. These databases are prepared and maintained by various Federal and state environmental agencies, such as the U.S. Environmental Protection Agency (EPA; see Appendix A) and the Nevada Division of Environmental Protection (NDEP; see Appendix A). The minimum appropriate search distance was 1 mile from the subject property's boundary (Table 1). The EDR report showing all information pertaining to the database searches is presented in Appendix A.

GSRC also conducted searches on NDEP and EPA databases via the internet for information such as Enforcement and Compliance History Online (ECHO) and Envirofacts Warehouse. No information regarding additional environmental concerns within or in the vicinity of the subject property was found in the Federal or state databases (NDEP 2006 and EPA 2006).

Table 1. Summary of Database Information Received During Preparation of the EBS

Primary Federal Databases	Date of Database	Search Distance*
Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	March 2006	1.0 mile
Resource Conservation and Recovery Act (RCRA) Information-Transportation, Storage, and Disposal Facilities (RCRA-TSD); Large Quantity Generators (LQG) and Small Quantity Generators (SQG)	June 2006	1.0 mile
Emergency Response Notification System (ERNS)	December 2005	1.0 mile
Hazardous Materials Incident Report System (HMIRS)	July 2006	1.0 mile
Department of Defense Sites (DOD)	December 2004	Subject Property
Toxic Release Inventory (TRIS)	December 2004	1.0 mile
FIFRA/TSCA Tracking System (FTTS)	July 2006	1.0 mile
Integrated Compliance Information System (ICIS)	April 2006	1.0 mile
PCB Activity Database (PADS)	February 2006	1.0 mile
Facility Index System (FINDS)	July 2006	1.0 mile
Primary State Databases	Date of Database	Search Distance*
Corrective Action Case List (SHWS)	February 2006	1.0 mile
Solid Waste Facilities/Landfill Sites (SWF/LF)	October 2005	1.0 mile
Recycling Information Listing (SWRCY)	February 2006	1.0 mile
Leaking Underground Storage Tank Incident Reports (LUST)	March 2006	1.0 mile
Listing of Wastewater Facilities (NPDES)	June 2006	1.0 mile
Registered Underground Storage Tanks (UST)	July 2006	1.0 mile
Hazardous Materials Repository Information Data (TIER 2)	March 2006	1.0 mile

Source: EDR, Inc. 2006.

*In accordance with ASTM E1527-05

Primary Federal and State Databases

Primary Federal databases reviewed by EDR, Inc. included:

- The National Priorities List (NPL; see Appendix A) – This database includes EPA NPL sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.
- Delisted NPL – This database includes EPA final NPL sites where remedies have proven to be satisfactory or sites where the original analyses were inaccurate, and the site is no longer appropriate for inclusion on the NPL.
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS; see Appendix A) – This database contains an extract of sites that have been or are in the process of being investigated for potential environmental risk.

- CERCLIS No Further Remedial Action Planned (CERCLIS-NFRAP; see Appendix A) – This database includes sites, which have been determined by the EPA, following preliminary assessment, that no longer pose a significant risk or require further activity under CERCLA.
- Resource Conservation and Recovery Act Information (RCRA; see Appendix A) – This database includes handlers, generators, transporters, violations, corrective actions, and treatment, storage and disposal facilities of hazardous wastes.
- Department of Defense (DOD; see Appendix A) Sites – This database contains a list of DOD sites located within the subject property.
- Emergency Response Notification System (ERNS; see Appendix A) – This database contains data on reported releases of oil and hazardous substances.
- FIFRA/TSCA Tracking System (FTTS; see Appendix A) – Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA; see Appendix A)/Toxic Substances Control Act (TSCA; see Appendix A) and Emergency Planning and Community Right-to-Know Act (EPCRA; see Appendix A) tracking system regarding pesticide enforcement actions, compliance activities related to FIFRA, and activities related to EPCRA over the previous 5 years.
- Integrated Compliance Information System (ICIS; see Appendix A) – This database supports the needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES; see Appendix A) program.
- PCB Activity Database (PADS; see Appendix A) – This database identifies generators, transporters, commercial storers and/or brokers and disposers of polychlorinated biphenyls (PCBs; see Appendix A) who are required to notify the EPA of such activities.
- Facility Index System (FINDS; see Appendix A) – This database contains both facility information and 'pointers' to other sources that contain more detail.

Primary state databases reviewed by EDR include:

- Corrective Action Case List (SHWS; see Appendix A) – This is a listing of corrective action sites.
- Landfill List (SWF/LF; see Appendix A) – This is a list of solid waste facilities/landfill sites.
- Recycling Information Listing (SWRCY; see Appendix A) – This is a listing of registered waste tire collection sites.
- Leaking Underground Storage Tank Incident Reports (LUST; see Appendix A) – This is an inventory of reported leaking underground storage tank incidents.
- Underground Storage Tank List (UST; see Appendix A) – This is a list of registered USTs in the State of Nevada.
- Hazardous Materials Repository Information Data (TIER 2) – This is a list of EPCRA required facilities which store or manufacture hazardous materials.

A total of 13 databases were recognized during the search conducted by EDR. Note that many of the facilities/sites listed in the EDR report were listed in multiple databases. The EDR report

indicates that there are 109 sites/facilities recorded from the database search within the search radii that may have or have generated, stored, treated, and/or disposed of solid or hazardous waste within or near the subject property (Table 2).

All information listed in Table 2 was derived directly from the EDR report. Facilities/sites listed in the EDR report that were greater in distance to the subject property than the distance of the search radii promulgated in the ASTM guidelines were not included in Table 2 and were not considered to be a threat to the subject property. Also, facilities/sites that are located down-gradient to the subject property at a distance not considered to pose a threat to the property (34 sites) were not included in Table 2.

THIS PAGE LEFT INTENTIONALLY BLANK

Table 2. List of Facilities from EDR Report

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
Nellis AFB Nellis AFB, NV	Subject Property	DOD	This database lists Nellis AFB as a Department of Defense site greater than 640 acres	No. Subject property is not located in an area of the base that would pose an environmental risk.
NVARNG Floyd Edsall Complex 6402 N. Range Road Las Vegas, NV 89115	1 mile/N/NE	RCRA-SOG FINDS\HA ZNET	This facility is a SQG for hazardous waste. Several informal enforcement actions in 1998.	No. Due to the distance from the subject property and because the violation occurred over 7 years ago, this facility does not pose a threat to the subject property.
G&O Transportation, Inc. 5255 E. El Campo Grande Las Vegas, NV 89115	0.8 mile N	Ind.Haz Waste RCRA-SQG FINDS	This facility is a transporter of hazardous waste.	No. No violations for this facility.
Rebel Oil Company, Inc. 5095 E. El Campo Grande Las Vegas, NV 89115	0.7 mile/N	TIER2	This facility, at one time, stored or manufactured 1.9 million pounds of alcohol.	No. No violations exist for this facility.
Baker Commodities, Inc. 5725 Range Road Las Vegas, NV 89115	0.65 mile/NE	FINDS	This facility is listed as having an NPDES permit.	No. No violations exist and no threat of contamination is evident from this facility
Summit View Youth Center 5730 Range Road Las Vegas, NV 89115	0.65 mile/NE	FINDS	This facility is listed in the FINDS database because it is a school located near the subject property.	No. No violations exist and no threat of contamination is evident from this facility

Table 2, continued

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
Southwest Auto Wrecking 5380 North Novak Street Las Vegas, NV 89115	0.3 mile/NW	SHWS	This facility had correction action taken against it on July 11, 1991 for the release of petroleum hydrocarbons to the soil.	No. The case was closed on December 7, 1992.
K & L Auto Wrecking 4540 E. Hammer Lane Las Vegas, NV 89115	0.3 mile/NW	SWRCY	This facility is listed as a generator of waste tires.	No. No violations exist for this facility.
EV CON Recycling 4560 Hammer Lane Las Vegas NV 89115	0.3 mile/NW	RCRA- SQG FINDS HAZNET	This facility is listed as being a conditionally exempt SQG.	No. No violations exist for this facility.
A 1 Auto & Salvage 4520 Hammer Lane Las Vegas, NV 89115	0.3 mile/NW	SHWS	This facility is listed as being a conditionally exempt SQG.	No. No violations exist for this facility.
USAF Nellis AFRC OMS 5550 Range Road Las Vegas, NV 89115	0.6 mile/NE	RCRA- SQG	This facility is listed as being a conditionally exempt SQG.	No. No violations exist for this facility.
Sierra Ready Mix 4150 Smiley Road Las Vegas, NV 89031	0.6 mile/W	LUST UST TIER 2	This facility is listed as reporting numerous spills of petroleum and non-petroleum products. It also stores numerous listed hazardous materials	No. The facility is located over 0.5 mile down gradient from the subject property
Parts 4950 Copper Sage Las Vegas, NV 89115	adjacent/W	SWRCY	This facility is listed as being a generator of waste tires.	No. No violations exist for this facility, and any future spills would be <i>de minimis</i> .
Greenleaf 4995 Copper Sage Street Las Vegas, NV 89115	adjacent/W	SWRCY	This facility is listed as being a generator of waste tires.	No. No violations exist for this facility, and any future spills would be <i>de minimis</i> .
Ken's Auto Wrecking 5051 Copper Sage Road Las Vegas, NV 89115	adjacent/W	SWRCY	This facility is listed as being a generator of waste tires.	No. No violations exist for this facility, and any future spills would be <i>de minimis</i> .

Table 2, continued

Facility Name/ Address	Distance/Direction From Subject Property	Database	Comments	Potential Threat to Subject Property?
Burt's Main Gate Wrecking 5070 Copper Sage Las Vegas, NV 89115	adjacent/W	SHWS	This facility is listed as being a generator of waste tires and reported a spill of gasoline into the soil on February 5, 2003.	No. Any future spills would be <i>de minimis</i> , and the previous spill case was closed in 2005.
Walton's Salvage 4904 Copper Sage Las Vegas, NV 89115	adjacent/W	SHWS	This facility reported a spill of waste oil into the soil on February 6, 1995.	No. The spill was cleaned up and the case was closed on March 8, 1995, and any future spills would be <i>de minimis</i> .
Nevada Pic-a-Part 5090 N. Lamb Blvd. Las Vegas, NV	0.50 mile/W	SWRCY	This facility is listed as being a generator of waste tires.	No. The facility has no history of violations.
Vegas Oil 5105 N. Lamb Blvd. Las Vegas, NV	0.5 mile/W	SHWS	This facility reported a hydrocarbon products release in 1996, but the case was closed July 3, 1996.	No. Facility is located 0.5 mile down gradient from the subject property.
Rinker Materials West 5030 N. Lamb Blvd. Las Vegas, NV	0.5 mile/W	TIER 2	This facility stores and uses petroleum products and other hazardous materials.	No. The facility has no history of violations.
34 Facilities in Other Areas Down-Gradient	0.5 to 1 mile/down-gradient	Various	There are 34 additional facilities listed that are located a significant distance down-gradient from the subject property and do not pose any environmental risk to the subject property.	No. these facilities are located down-gradient from the subject property

THIS PAGE LEFT INTENTIONALLY BLANK

Historical Maps/Aerial Photographs

A search was made by EDR and GSRC for historical aerial photographs and historical quadrangle maps available for the subject property. Historical topographic quadrangle maps were available for 1952, 1974 and 1982. Historic aerial photographs were obtained from Nellis AFB staff and were available for the years of 1943 through 2005. These maps typically show any development or habitat changes over the years. The historical topographic quadrangles and aerial photographs reviewed by GSRC are listed in Table 3 and can be found in Appendix C.

Table 3. Historical Topographic Quadrangles/Aerial Photographs Reviewed

DATE	QUADRANGLE/PHOTOGRAPH NAME	SCALE
1943	Nellis AFB	----
1952	Las Vegas/Gass Peak SW	1:62,500
1958	Nellis AFB	----
1973	Nellis AFB	----
1974	Las Vegas NE	1:24,000
1974	Valley	1:24,000
1982	Las Vegas NE	1:24,000
1982	Valley	1:24,000
1984	Nellis AFB	----
1990	Nellis AFB	----
1995	Nellis AFB	----
2005	Nellis AFB	----

Source: Nellis AFB 1943, 1958, 1973, 1984, 1990, 1995, 2005; U.S. Geological Survey 1952, 1974, 1982.

Facility Response Plan

The *Final Draft, Nellis Air Force Base 19-1, Facility Response Plan* (Nellis AFB 2006a) and spill report file was reviewed to determine if spills of reportable quantities have occurred within Area III in the past 5 years. Nellis AFB is required to keep track of all reportable quantity spills for a period of 5 years and institute a facility response plan based on the occurrences of those spills. A reportable quantity, as per Nevada state regulations, is the release of 25 gallons or more of petroleum products such as gasoline, diesel, and hydraulic fluid or the impact of 3 cubic yards (yds³) or more of soil by a hazardous material (NDEP 2006b). According to information from the facility response plan, no reportable spills have occurred within the subject property.

Tract Register of Acquisition

The chain of title information was researched and reviewed by the Nellis AFB real estate office to determine historical ownership of the subject property since its inception as a military installation. Table 4 summarizes the transactions that occurred for the acquisition of the subject property after July 1, 1940 (Figure 3, Appendix B). No detailed record of property transactions on the base is available in the county land record database, and all property title information was acquired from the Nellis AFB real estate office. The exact location of the subject property relative to tracts listed on the Nellis AFB property map is uncertain, however, all possible parcels affected are listed in Table 4 and indicated in Figure 3, Appendix B.

Table 4. Chain of Title for the Subject Property

Tract Number Acquired	Name of Seller
B121	Annie E. Dixon
B142	A. T. Hoffman
B143	Hyman Brown, etux.
B141	Leonard R. Wilson, et al.
B120	Mary G. Parcell

2.1.2 Property Inspections

A site reconnaissance was conducted on September 5, 2006 by Mr. Michael Hodson, Ms Joanna Cezniak, Mr. Howard Nass and Dr. Eric Webb. The focus of the effort was to investigate the subject property for visual evidence of any adverse impacts due to potential hazardous or toxic substances, or the presence of potential sources for impacts, such as drums, petroleum products and leaking USTs.

The 86-acre tract containing the subject property was accessible by vehicle and by foot from the north and from several unimproved roadways scattered throughout. The property area consists of open desert scrub land that supports a diversity and density of vegetation (approximately 40 to 50 percent ground coverage). The topography of the majority of the subject property is gently sloping terrain with a general slope to the south and southeast. At least three definitive ephemeral drainage areas traverse the property from north to south, with typical dendritic storm water flow patterns. The drainage areas terminate into a large open ditch that runs northwest to southeast along the Manch Manor base housing area. The ground elevation of the subject property is approximately 30 to 40 feet higher to the northwest with a gradual slope to the

drainage ditch in the southeast. No buildings or standing structures were observed on the subject property.

Throughout the tract containing the subject property there is scattered debris and minor solid waste and discarded items. Surveys of the property revealed a variety of solid waste, including: sheet metal, miscellaneous car parts, paper, styrofoam, empty plastic barrels, discarded pallets, broken furniture, glass bottles and metal cans, broken concrete, and building demolition debris. None of the debris and solid waste found would constitute an environmental risk to the subject property.

Site photographs of the subject property can be found in Appendix D. An index map of site photograph locations can be found in Figure 5 in Appendix B.

2.1.3 Personal Interviews

The key personnel contacted regarding operations and history in Area III are listed below, and a summary of their interviews are presented in Appendix F. Interviews conducted in June 2006 for the “Phase I Environmental Baseline Survey for the Leasing of Nellis AFB Land for Construction and Operation of a Solar Photovoltaic System, Clark County, Nevada” in Area III were also used for this project (Nellis AFB, 2006b).

D. J. Haarklau, Environmental Fuels Program Manager, Nellis AFB

Bernd Schmidt, Restoration Program Manager, Nellis AFB

Patrick Quinn, Environmental Engineer, Nellis AFB

Chief James Boley, Nellis AFB Fire Department

2.1.4 Sampling

No air, soil, or water samples were taken within the subject property as part of this Phase I EBS. Existing information and sampling data for areas northeast of the subject property provided by Nellis AFB were reviewed.

THIS PAGE LEFT INTENTIONALLY BLANK

SECTION 3.0
FINDINGS FOR SUBJECT PROPERTY

3.0 FINDINGS FOR SUBJECT PROPERTY

3.1 HISTORY AND CURRENT USE

The documents reviewed by GSRC to determine historical land uses and potential environmental conditions associated with those uses regarding the subject property and surrounding areas are described in the paragraphs below.

3.1.1 Historic Topographic Quadrangles

The 1952 historic quadrangle (Appendix C) showed the subject property to be undeveloped. The munitions bunkers can be seen northeast of the subject property. The 1974 and 1982 historic quadrangles (Appendix C) showed no developments within the subject property.

3.1.2 Historic Aerial Photographs

The historic aerial photographs from 1943, 1958, 1961, 1969, 1973, 1984, 1990, 1995 and 2005 (Appendix C) showed the subject property to be undeveloped desert scrub. In 1943 there was no development in the vicinity of the subject property. In 1958 and 1961 the munitions bunkers were visible to the northeast of the property. In 1969 two small auto salvage yards were visible to the west of the property with no fence separating them from Nellis AFB property. In 1973 two additional salvage yards were visible, and the base housing in Manch Manor Estates was partially complete to the south. In 1984 the base housing had been developed to its current limits to the south, and salvage yards had completely filled the property adjacent to the western boundary of the base. The Nellis AFB vehicle storage lot south of the munitions bunkers was also visible with vehicles in place. The 1990, 1995 and 2005 photographs showed little change from 1984. The perimeter fence was visible in the 2005 photograph.

Current use of the subject property is open areas of undeveloped land (Site Photographs 1 through 5; see Appendix D).

3.2 ENVIRONMENTAL SETTING

The subject property is located in the Las Vegas Valley which is one of the driest and warmest areas in the U. S. The climate consists of hot summers, cool winters, and a wide fluctuation in annual rainfall. Temperatures through a year can range from average daily maximums in July of

104 degrees Fahrenheit (°F; see Appendix A) to average daily minimums in January of 33 °F. Several washes and drainages traverse the subject property in a southerly direction. The drainages crossing the western portion of the subject property terminate in a drainage ditch, which carries stormwater away from the Manch Manor Estates base housing. Stormwater is also lost through percolation and evaporation. Figure 6 in Appendix B illustrates the flow direction of surface water in and around the subject property. The groundwater within the subject property is recharged by precipitation from the surrounding mountain ranges. On Nellis AFB, multiple shallow, semi-confined aquifers occur at depths from 60 to 120 feet below ground surface (bgs) and from 600 to 1000 feet bgs. (Nellis AFB 1996).

3.2.1 Soils

Soils within the tract containing the subject property are made up of three complexes: (1) the Las Vegas-Skyhaven Complex, (2) the Las Vegas-McCarren-Grapevine Complex, and (3) the Las Vegas-DeStazo complex (NRCS 2006). The distribution of soils on the subject property can be found in Figure 7 in Appendix B. The majority of the property (90 percent) is composed of the Las Vegas-McCarren-Grapevine complex, 0 to 4 percent slopes. This complex contains mixed Las Vegas fine gravelly loam (40 percent), McCarren fine sandy loam (25 percent), Grapevine very fine sandy loam (20 percent), and other soils (15 percent). The Las Vegas soil is a shallow well-drained soil formed in alluvium derived from limestone and dolomite. It has a low water capacity and moderately slow permeability. The McCarren soil formed in alluvium derived from limestone, sandstone, and gypsiferous sediment. The Grapevine soil formed in alluvium derived from different types of rocks that have a high content of gypsiferous material. Both the McCarren and Grapevine soils are very deep and well drained. Permeability is moderate in Grapevine soil and moderately slow in McCarren soil. Available water capacity is moderate in McCarren soil and high in Grapevine soil.

For all three soils, runoff is slow and the hazard of water erosion is slight, but the hazard of blowing soil is high. All three soils are subject to rare periods of flooding from prolonged, high-intensity storms. Primary limitations of the soils in this complex for construction are the hazard of flooding and limited depth to hardpan in the Las Vegas soil. Gypsum in the McCarren and Grapevine soils can corrode concrete, and excessive irrigation can dissolve gypsum in the soil resulting in subsidence.

3.2.2 Topography

The topography within and in the vicinity of the subject area is sloping to the south with steeper slopes near washes and drainages. However, overall topography within the regional area slopes downward to the south and southeast from the southern Sheep and Las Vegas Ranges toward the Las Vegas Valley. The average elevation of the subject property is approximately 1,920 feet above mean sea level. There is an approximate 30 to 40 feet difference in elevation from the northwest to the southeast on the tract containing the subject property.

3.2.3 Vegetation

According to the 2001 Draft Integrated Natural Resources Plan (INRMP) for Nellis AFB (Nellis AFB 2001), native Nellis AFB vegetation can be categorized as a creosote bush/white bursage (*Larrea tridentata*-*Ambrosia dumosa*) vegetative community. This vegetative community occurs from sea level to approximately 3,900 feet above MSL. Although the majority of Nellis AFB is developed, the creosote bush/white bursage community can be found in the majority of undisturbed areas. This plant community can contain, but is not limited to, saltbush (*Atriplex* spp.), prickly pear and cholla (*Opuntia* sp.), Joshua tree (*Yucca brevifolia*), desert trumpet (*Eriogonum inflatum*), cheesebush (*Hymenoclea salsola*), and ephedra (*Ephedra* sp.). Russian thistle (*Salsola* sp.), a noxious weed, commonly occurs in disturbed areas.

3.2.4 Fauna

Within the tract containing the subject property, wildlife fauna observed included: burrowing owl (*Athene cunicularia*), mourning dove (*Zenaida macroura*), Gambels quail (*Callipela gambelii*) and ground squirrels (*Spermophilus* sp.).

3.2.5 Threatened, Endangered and Rare Species

Las Vegas bear poppy (*Arctomecon californica*), listed as Fully Protected by the State of Nevada, was found on the 86-acre tract containing the subject property in sparsely vegetated, level areas and in disturbed areas at slightly higher elevations. The distribution was patchy in large patches, +/- 20 square feet, consisting of 10 to 30 individuals. The population appeared healthy with high recruitment as indicated by numerous smaller individuals less than 3 inches in height which originated as seeds from the surrounding population.

Las Vegas buckwheat (*Eriogonum corymbosum*), listed as a potential endangered species by the State of Nevada, was found on the 86-acre tract containing the subject property at lower

elevations associated with drainages. It was found in relatively dense shrub/grass dominated areas to the southeast and in relatively sparsely vegetated areas to the west. It was sparsely distributed in small clumps of two to five individuals. The exact locations of the population were not mapped due to the scattered distribution of the species, however they are more likely to be found in the drainage areas, and would likely be found within the proposed lease areas. The population appeared healthy.

A distribution map of the State of Nevada listed species can be found in Figure 8 in Appendix B.

3.3 HAZARDOUS SUBSTANCES

Hazardous substances are those which can pose a risk to human health and safety through exposure to levels above those recommended as safe by the U.S. Environmental Protection Agency.

3.3.1 Hazardous Materials and Petroleum Products

According to record searches, interviews, and a site reconnaissance, no evidence of hazardous materials or petroleum products were observed within the subject property. The presence of auto salvage operations adjacent to Nellis AFB property and upslope of the subject property could have introduced petroleum products into the subject property in the past, however, no visible evidence was found in ground reconnaissance of the property.

3.3.2 Hazardous and Petroleum Waste

According to record searches, interviews, and a site reconnaissance, no evidence of hazardous or petroleum waste was observed within the subject property.

3.4 INSTALLATION RESTORATION PROGRAM CONTAMINATION

According to record searches, interviews, and a site reconnaissance, no evidence of restoration programs or contamination requiring a restoration program are present on the subject property.

3.5 STORAGE TANKS

3.5.1 Aboveground Storage Tanks

According to record searches, interviews, and a site reconnaissance, no aboveground storage tanks are within the subject property.

3.5.2 Underground Storage Tanks

According to interviews, document searches, and a site reconnaissance, no USTs are within the subject property.

3.5.3 Pipelines, Hydrant Fueling, and Transfer Systems

According to record searches, interviews, and a site reconnaissance, no pipelines, hydrant fueling or transfer systems are located within the subject property.

3.6 OIL WATER SEPARATORS

According to record searches, interviews, and a site reconnaissance no oil water separators are located within the subject property.

3.7 PESTICIDES

No visual evidence of the past use or storage of pesticides was found within the subject property.

3.8 MEDICAL BIOHAZARDOUS WASTE

According to record searches, interviews, and a site reconnaissance, no medical biohazardous waste is located within the subject property.

3.9 ORDNANCE

No visual evidence of ordnance was found within the subject property during the site reconnaissance. However, according to Mr. Patrick Quinn, ordnance were stored in bunkers in what is now the DRMO facility, adjacent to the subject property, from 1943 through the 1950s.

3.10 RADIOACTIVE WASTES

According to interviews, document searches, and visual observations, no storage or disposal of radioactive waste occurred within the subject property.

3.11 SOLID WASTE

Numerous types of solid waste were observed during reconnaissance of the acreage containing the subject property, which included household garbage and miscellaneous solid waste. Solid waste included sheet metal, miscellaneous car parts, paper, styrofoam, empty plastic barrels, discarded pallets, broken furniture, glass bottles and metal cans, broken concrete, and building demolition debris. The largest concentration of solid waste was observed west of the subject property at the Nellis AFB property boundary near the auto salvage yards. A pile of old linoleum floor tiles was observed to the north of the subject property that may contain small amounts of asbestos in a non-friable state. None of the solid waste observed would pose an environmental risk to the property.

3.12 GROUND WATER

The depth to groundwater in monitoring wells located northeast of the subject property ranges from approximately 117 feet to 123 feet bgs (Black and Veatch 2006). No evidence of groundwater contamination on the subject property was found during interviews and record searches of the subject property.

3.13 WASTEWATER TREATMENT, COLLECTION AND DISCHARGE

There is no historical or current evidence suggesting wastewater treatment, collection, or discharge occurred within the subject property.

3.14 DISCLOSURE ITEMS

3.14.1 Drinking Water Quality

Drinking water is not obtained from the subject property, nor was any evidence of public water wells found on the subject property.

3.14.2 Asbestos

No buildings or structures that could contain asbestos were observed within the subject property. A pile of linoleum tiles was observed to the north of the subject property, and these tiles may contain small amounts of asbestos (see Site Photograph 13, Appendix D). The asbestos in floor tiles is typically non-friable, but removal and disposal of these tiles should

follow applicable state and federal asbestos disposal and personal protection regulations for asbestos containing materials (ACM).

3.14.3 Polychlorinated Biphenyls (PCBs)

According to interviews, document searches, and visual observations, no transformers or other equipment containing possible PCBs are located within the subject property.

3.14.4 Radon

According to record searches, interviews, and a site reconnaissance, no radon sources are present within the subject property.

3.14.5 Lead-Based Paint

No buildings or structures that could contain lead-based paint were observed within the subject property.

THIS PAGE LEFT INTENTIONALLY BLANK

SECTION 4.0
FINDINGS FOR ADJACENT PROPERTIES

4.0 FINDINGS FOR ADJACENT PROPERTIES

4.1 LAND USES

All of the property to the north of the subject property is owned by Nellis AFB and is undeveloped desert scrub. To the west of the subject property there are several auto and metal salvage yards that have been in operation for approximately 30 years. Property south of the subject property is owned by Nellis AFB and contains the Manch Manor military housing. Defunct munitions bunkers and the Nellis AFB vehicle storage lot are located northeast of the subject property. Also east of the property is a vacant, undeveloped parcel owned by Nellis AFB that is scheduled for development to expand Manch Manor military housing (Figure 3; Appendix B).

4.2 SURVEYED PROPERTIES

All of the properties adjacent to the subject property were visually inspected for hazardous materials/waste and petroleum products, but the inspection was limited to what could be seen from the boundaries of the subject property. No visual evidence of contamination or other environmental concerns was found on the undeveloped desert scrub land to the north of the subject property.

The vehicle and metal salvage operations located adjacent to the western fence line of the subject property do contain materials and operations that could pose a slight environmental risk. All of these businesses recycle automobiles, and petroleum fluids from the recycled vehicles could leak onto the ground and be carried down-slope onto the subject property by storm water. Leaching of metals from exposed materials could also elevate the dissolved metals content of storm water leaving the salvage yards and entering the subject property. No visible evidence of any contamination from these businesses was found on the subject property.

Military housing located south of the subject property does not pose an environmental risk, and it is located down-slope from the property. The Nellis AFB vehicle storage lot located east of the subject property could pose a slight environmental threat due to leakage of fluids from stored vehicles. However, all of the vehicles appear in good condition, and any potential spills would be *de minimis*.

The munitions bunkers located adjacent to the northeast do not pose an environmental risk to the subject property, since, according to interviewed base personnel, no munitions have been stored in the bunkers since the 1950s (see Section 2.1.3 and Appendix F).

SECTION 5.0
APPLICABLE REGULATORY COMPLIANCE ISSUES

5.0 APPLICABLE REGULATORY COMPLIANCE ISSUES

5.1 LIST OF COMPLIANCE ISSUES

No information pertaining to non-compliance issues was found during interviews or document searches.

5.2 DESCRIPTION OF CORRECTIVE ACTIONS

No environmental compliance deficiencies exist on the subject property; therefore, no corrective actions will be required.

5.3 ESTIMATES OF VARIOUS ALTERNATIVES

No alternatives are applicable to the subject property.

THIS PAGE LEFT INTENTIONALLY BLANK

SECTION 6.0
CONCLUSIONS

6.0 CONCLUSIONS

6.1 FACILITY MATRIX

Twelve new housing units would be constructed on the lands proposed for lease. Three easements would be granted for stormwater drainages. No existing easements occur on the subject property.

6.2 PROPERTY CATEGORIES MAP

Since no hazardous materials are located on the subject property, no property categories maps are attached.

6.3 RESOURCES MAP

Since no critical resources are located on the subject property, no resource maps are attached.

6.4 DATA GAPS

The only data gap was the lack of appropriate historical documents back to 1940, particularly to the availability of appropriate 7.5-minute historic topographic quadrangles. Historical quadrangles were available for 1952, 1974, and 1982, and the topographic map from 1952 was at a greater scale than that recommended as a standard by ASTM. However, sufficient and credible information was obtained from historic aerial photographs to make an accurate determination of the historical uses of the subject property and surrounding areas prior to 1952.

THIS PAGE LEFT INTENTIONALLY BLANK

SECTION 7.0
RECOMMENDATIONS

7.0 RECOMMENDATIONS

Based on interviews, document searches, environmental database reviews, and a site reconnaissance, there is no evidence of any environmental risk on the subject property. Salvage operations west and upslope of the property could pose an environment risk in the event of a spill of recycled petroleum products. The small pile of possible asbestos containing floor tiles found to the north of the subject property should be disposed of in accordance with applicable ACM regulations. The remaining solid waste scattered throughout the subject property should be disposed of in accordance with local, state, and Federal regulations and the Nellis AFB Solid Waste Management Plan. GSRC recommends that no further environmental studies be conducted for the subject property.

CERTIFICATION OF NO CONTAMINATION

This real property contains no known hazardous substances as that term is defined in the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9601), as amended, or other contamination as specified by the Resource Conservation and Recovery Act of 1976, the implementing Environmental Protection Agency regulations (40 CFR Parts 261, 262, 263, and 761), and the Federal Property Management Regulations (41 CFR Part 101-47). A complete search of agency files revealed that no hazardous substance has been stored for more than one year, known to have been released, or disposed of on the real property described below.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/13/2006 has revealed that there is 1 RCRA-LQG site within the searched area.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RACT/BACT/LAER Clearinghouse (RBLC) data base contains case-specific information on the 'Best Available' air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). This information has been provided by State and local permitting agencies. The Clearinghouse also contains a regulation data base that summarizes EPA emission limits required in New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP), and Maximum Achievable Control Technology (MACT) standards.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL RECOVERY: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Next Scheduled EDR Contact: 11/20/2006
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/19/2006
Date Data Arrived at EDR: 06/22/2006

Last EDR Contact: 06/22/2006
Next Scheduled EDR Contact: 09/18/2006
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/01/2006
Date Data Arrived at EDR: 03/21/2006

Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: 800-424-9346
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 08/22/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/20/2006

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency

	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2004
Date Data Arrived at EDR: 02/17/2006
Date Made Active in Reports: 04/07/2006

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Facility List

Source: Department of Human Resources

Telephone: 775-684-1100

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

APPENDIX F
INTERVIEWS

INTERVIEWS WITH KEY SITE PERSONNEL NELLIS AIR FORCE BASE

Interviews were conducted in June, 2006 for an Environmental Baseline Assessment of a portion of Area III located 2,000 feet northeast of the Subject Property

Telephone interviews were conducted in September 2006 for this project

Mr. D.J. Haarklau, Base Environmental Fuels Program Manager

On June 22, 2006, GSRC interviewed Mr. Haarklau regarding his knowledge of environmental incidents or spills that have occurred within or near the subject property. According to Mr. Haarklau, Nellis AFB is required to keep a record of all reportable quantity spills for a period of 5 years. He told GSRC that the base was in the process of preparing a facility response plan that lists all reportable quantity spills on base. Mr. Haarklau provided GSRC with a list of reportable spills that have occurred in the last 5 years, but none of the spills have occurred within the subject property. Mr. Haarklau also researched a spill report file for the subject property and said that there was nothing in the file pertaining to spills on the subject property. Mr. Haarklau advised GSRC that the DRMO area accepts recyclable material and batteries, but not fuel or petroleum, oil, and lubricants (POLs) are stored on-site. All containers are drained of their fluids before entering the DRMO area. Batteries are stored on containment pallets, and are banded, wrapped, and shipped for proper disposal.

In a telephone interview on September 28, 2006, Mr. Haarklau stated that, to his knowledge, there had never been any operations involving fuels or hazardous materials in the area of the subject property. Several small petroleum product spills have occurred in the past in the DRMO area, but they were contained on the asphalt surface and were cleaned up and remediated on site with no effects beyond the DRMO area.

Mr. Bernd Schmidt, Restoration Program Manager

On June 22, 2006, GSRC interviewed Mr. Schmidt to obtain information pertaining to historical or current releases or contamination within or in the vicinity of the subject property. According to Mr. Schmidt, he is the Restoration Program Manager at Nellis AFB and said that there have been historical releases of benzene, toluene, ethylbenzene, and xylenes (BTEX); halogenated volatile organic compounds (HVOCs); methyl tertiary butyl ether (MTBE) to groundwater; and light non-aqueous phase liquid south and southeast of the subject property. These releases have been identified and named under the Environmental Restoration Program (ERP). The sites include Sites ST-27, SS-46, SS-28, ST-44 and ST-45. Mr. Schmidt told GSRC that the base is currently remediating the contaminated groundwater through a pump and treat system, and the water is then used to irrigate the golf course on the base. Mr. Schmidt advised GSRC that a mixture of MTBE and BTEX product has been detected in the base's monitoring wells south of the Kinder Morgan pipeline terminal and said a monitoring report was conducted by TRC that determined the plume of contamination released from that facility.

In a telephone interview on September 28, 2006, Mr. Schmidt stated that there are no restoration or remediation sites within or adjacent to the subject property.

Mr. Patrick Quinn, Environmental Engineer

On June 22, 2006, GSRC questioned Mr. Patrick Quinn about his knowledge of any environmental incidents or concerns within or near the vicinity of the subject property. He mentioned that the Defense Reutilization and Marketing Office (DRMO) Area was used as an ammunition storage area during World War II but is now used to store scrap metal, aircraft parts, and office furniture.

Chief James Boley, Nellis AFB Fire Department

On June 29, 2006, GSRC contacted Chief Boley in regards to his knowledge of environmental incidents or fires that his department has responded to within or near the subject property. According to Chief Boley, who has been with the department for over 7 years, no environmental incidents or spills have occurred within the subject property. He mentioned that the department has responded to a couple of structure fires near the RV storage area off of Blytheville Drive, but nothing within or near the subject property.
